Summary

Product Manager with 5+ years of experience building and scaling B2B and B2C products across fintech, e-commerce, payments, order management (OMS), and supply chain ecosystems. Proven expertise in delivering API-driven platforms, payment workflows, fulfillment and logistics solutions, and operational automation at scale. Skilled in Agile product management, roadmap prioritization, stakeholder alignment, and translating complex business requirements into impactful product features. Strong experience working with cross-functional teams across engineering, operations, and business functions to drive end-to-end product delivery, platform integrations, process optimization, and measurable business outcomes.

Experience

Fynd (Reliance Retail) 05/2025 – Present

Product Manager 2 (E-commerce) Mumbai, India

- **Enterprise Platform Delivery:** Owned end-to-end delivery of platforms, including Google Vertex AI, SAP integrations, and cloud-based catalogue systems for large-scale retail operations.
- **Agile Execution:** Managed product backlog in Jira; wrote user stories with acceptance criteria and defined MVPs aligned with business goals. Led Sprint Planning, Stand-ups, and Sprint Reviews.
- **Serviceability Redesign:** Improved operational efficiency by ~65% by redesigning serviceability workflows and introducing dynamic scheduling logic.
- **Cross-functional Alignment:** Collaborated with SCM, ops, and engineering on MongoDB, GCP, CI/CD (Azure pipelines, mono-repo) to refine delivery partner logic and automate promise accuracy.
- **Customer Journeys:** Designed customer servicing journeys, identifying pain points and improving delivery experience at scale.

Lepton Software 08/2024 – 04/2025

Assistant Product Manager (Telecom) Gurgaon, India

- **WFM Product Ownership:** Defined and shipped WFM flows and APIs for Vi (Vodafone) & Dialog; led a 4-member dev team (backend & frontend).
- **Dashboard Revamp:** Reduced data load time for 90-day logs from 5–7 minutes to under 5 seconds (~99% faster) by introducing real-time visual reports; improved visibility across stakeholders.
- **Scrum Leadership:** Acted as Scrum lead — managed sprint planning, backlog prioritization, and ensured timely delivery across cross-functional teams.
- **API Triage:** Analyzed and triaged API issues using Oracle SQL Developer & pgAdmin; validated endpoints in Postman; managed tickets via HPSM/OWS/NMS using MySQL/Postgres.

DotPe 10/2021 – 01/2024

Assistant Integration Manager (F&B, FinTech) Gurgaon, India

- **Enterprise Integrations:** Led 200+ enterprise merchant integrations across payment systems and API-driven platforms, ensuring SLA compliance and high system reliability in a high-volume transaction environment.
- **QSR Platform Ownership:** Owned end-to-end Swiggy, Zomato, Magic Pin, Thrive & Shopify integration for a major QSR brand — covering catalogue enrichment, API GET/POST flows, delivery partner integration, and serviceability optimization.
- **POS Solutions:** Built POS-based solutions for enterprise clients, including McDonald's, Starbucks, Costa Coffee, Vaango, Blue Tokai, Biryani Blues, and Haldiram.
- **Monitoring Dashboards:** Built real-time dashboards (Snowflake/Redash) to track order failures, API latency, and system health — reducing incident detection time by ~70%.

Planet Spark 04/2021 – 08/2021

Product Analyst (EdTech) Gurgaon, India

- Built web services with HTML & Bootstrap; managed CRM ticket delivery and faculty incentive strategy.
- Created dashboards/reports in MySQL for performance tracking.

Skill Vertex01/2021 – 03/2021

Product & Web Intern (EdTech) *Bangalore, India*

- Built and maintained WordPress pages with custom HTML/CSS; shipped front-end updates and improved UI responsiveness.
- Optimized backend data workflows for registrations and course catalogues, improving data accuracy by ~25% and reducing reporting discrepancies.
