

ARYAN SHARMA

Product Manager

aryansharma73095@gmail.com | +91-73095-44193 | linkedin.com/in/imaryansharma | github.com/imaryansharma

SUMMARY

Product Owner with approx. 5 years of experience delivering scalable, API-driven platforms across fintech and e-commerce domains. Strong expertise in Agile delivery, backlog prioritization, and translating complex business requirements into actionable user stories. Proven ability to collaborate with cross-functional teams across engineering, operations, and strategy to drive end-to-end product delivery. Experienced in data-driven decision making, platform integrations, and improving operational efficiency. Seeking to contribute to large-scale enterprise product transformation initiatives in financial services.

SKILLS

- **Product management:** Agile, Scrum, Kanban, Product discovery, PRDs & user stories, Roadmap & Backlog refinement, Release management (UAT/SIT), Stakeholder & Vendor management, MVP definition, Sprint Planning
- **Tech skills:** APIs (REST), Postman, Python, MySQL, PostgreSQL, SQL Server (GCP), MongoDB, Snowflake, Oracle SQL Developer, pgAdmin, GCP, BQ, CI/CD, SAP interfaces, WFM/3PO/POS/CRM (Salesforce), Git, Jira, Confluence, ServiceNow
- **Architecture:** Microservices, API-driven systems, distributed systems, cloud-based platforms
- **Business skills:** Payment systems, credit lifecycle awareness, risk & collections workflows, SLA-driven servicing operations

WORK EXPERIENCE

Fynd | Product Manager (E-commerce)

05/2025 – Present

- Owned end-to-end delivery of enterprise platforms including Google Vertex AI, SAP integrations, and cloud-based catalog systems for large-scale retail operations.
- Managed product backlog in Jira, write user stories with acceptance criteria, and define MVPs aligned with business goals.
- Designed customer servicing journeys, identifying pain points and improving delivery experience.
- Collaborated with engineering on MongoDB, GCP, infra, testing, and CI/CD setup using mono-repo and Azure pipelines.
- Participate in Sprint Planning, Daily Stand-ups, and Sprint Reviews; define sprint goals and review/accept stories during sprint cycles.
- Improved operational efficiency by ~65% by redesigning serviceability workflows and introducing dynamic scheduling logic.
- Aligned with SCM, ops, and tech to refine delivery partner logic and automate promise accuracy.
- Translated complex business requirements into structured user stories and process flows to support scalable platform modernization initiatives.

Lepton Software | Assistant Product Manager (Telecom)

08/2024 – 04/2025

- Defined and shipped WFM flows and APIs for Vi (Vodafone) & Dialog; led a 4-member dev team (backend & frontend).
- Acted as Scrum lead for cross-functional teams, managing sprint planning, backlog prioritization, and ensuring timely delivery of user stories.
- Revamped the WFM dashboard by introducing real-time visual reports — reducing data load time for 90-day logs from **5–7 minutes to under 5 seconds (~99% faster)** and improving visibility across stakeholders.
- Enhanced operational efficiency by automating key monitoring workflows and integrating dashboard metrics with API endpoints for live updates.
- Analyzed and triaged API issues using Oracle SQL Developer & pgAdmin; validated endpoints in Postman; managed tickets via HPSM/OWS/NMS and in-house tools using MySQL/Postgres.

DotPe | Assistant Integration Manager (F&B, FinTech)

10/2021 – 01/2024

- Led 200+ enterprise merchant integrations across payment systems and API-driven platforms, ensuring SLA compliance and high system reliability in a high-volume transaction environment.
- Worked closely with payment gateways, order flows, and failure scenarios, improving system reliability and reducing operational risk.
- Handled key enterprise merchants with inventory and SAP integrations across websites, 3PO systems, and payment gateways.
- Owned end-to-end Swiggy, Zomato, Magic Pin, Thrive & **Shopify integration for a major QSR brand**, covering catalog enrichment, API GET/POST flows, delivery partner integration, self-delivery setup, and serviceability optimization.
- Built real-time monitoring dashboards (Snowflake/Redash) to track order failures, API latency, and system health—reducing incident detection time by ~70% and improving operational decision-making.
- Built POS-based solutions for enterprise clients like McDonald's, Starbucks, Costa Coffee, Vaango, Blue Tokai, Biryani Blues, and Haldiram.

Planet Spark | Product Analyst (EdTech)

04/2021 – 08/2021

- Built web services with HTML & Bootstrap; managed CRM ticket delivery and faculty incentive strategy.
- Created dashboards/reports in MySQL for performance tracking.

Skill Vertex | Product & Web Intern (EdTech)

01/2021 – 03/2021

- Built and maintained WordPress pages with custom HTML/CSS for *skillvertex.in*; shipped front-end updates and improved UI responsiveness.
- Optimized backend data workflows for registrations and course catalogs by introducing validation scripts and automated error checks, improving data accuracy by ~25% and reducing reporting discrepancies.

EDUCATION

Lovely Professional University (LPU) — B.Tech, Computer Science & Engineering

2017 – 2021

Sun Beams, Kanpur (UP Board) — Senior Secondary (PCM + CS)

2016 – 2017

CERTIFICATIONS & TRAININGS

Snowflake DB (2023)

Data Engineering Nano Degree (2020)

C++ (2020); Web Development (2019)

Product Management: Building a Product Roadmap — LinkedIn.

PERSONAL PROJECTS

- Data Manipulation Dashboard (Python)
- Disintegration Dashboard (MySQL/Redash/Snowflake)
- Google Assistant Action
